

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1 (original): A cutting machine for napped cloth to cut a napped cloth having a single napped surface, comprising:

a cutting means for cutting the napped cloth by advancing a cutter through the napped surface.

2 (original): A cutting machine for napped cloth as defined in Claim 1, wherein the cutting means cuts the napped cloth by moving the cutter so that both V_y , a component of velocity in a direction wherein a blade of the cutter extends, and V_x , a component of velocity in a direction orthogonal to the direction wherein the blade of the cutter extends become larger than 0.

3 (original): A cutting machine for napped cloth as defined in Claim 2, wherein V_x/V_y , a ratio of the component of velocity V_x to the component of velocity V_y satisfies the following conditional expression:

$$0.5 < V_x/V_y < 2.0$$

4 (original): A cutting machine for napped cloth as defined in Claim 1, further comprising a fastener means to sandwich and fasten the napped cloth from both sides thereof during cutting of the napped cloth.

5 (original): A cutting machine for napped cloth as defined in Claim 2, further comprising a fastener means to sandwich and fasten the napped cloth from both sides thereof during cutting of the napped cloth.

6 (original): A cutting machine for napped cloth as defined in Claim 3, further comprising a fastener means to sandwich and fasten the napped cloth from both sides thereof during cutting of the napped cloth.

7 (original): A cutting machine for napped cloth as defined in Claim 1, wherein the napped cloth is a light shielding cloth of a cassette for housing a photographic roll film.

8 (original): A cutting machine for napped cloth as defined in Claim 2, wherein the napped cloth is a light shielding cloth of a cassette for housing a photographic roll film.

9 (original): A cutting machine for napped cloth as defined in Claim 3, wherein the napped cloth is a light shielding cloth of a cassette for housing a photographic roll film.

10 (original): A cutting machine for napped cloth as defined in Claim 4, wherein the napped cloth is a light shielding cloth of a cassette for housing a photographic roll film.

11 (original): A cutting machine for napped cloth as defined in Claim 5, wherein the napped cloth is a light shielding cloth of a cassette for housing a photographic roll film.

12 (original): A cutting machine for napped cloth as defined in Claim 6, wherein the napped cloth is a light shielding cloth of a cassette for housing a photographic roll film.

13 (new): A cutting machine for napped cloth as defined in Claim 1, wherein the cutting means cuts the napped cloth apart.

14 (new): A cutting machine for napped cloth as defined in Claim 1, wherein the cutting means cuts the napped cloth from one side of the napped cloth through to another side of the napped cloth.
